Zaika Dining & Bar

Login credentials for every account in the seed database — who they are, what they can do, and which screen to type them into.

The three login screens

Each one takes a different kind of identifier. This is the single most common thing to get wrong.

Screen	URL	You enter
Staff / POS	`localhost/RestaurantProject/adminSide/StaffLogin/login.php`	**Account ID** (a number) + password
Customer	`localhost/RestaurantProject/customerSide/customerLogin/login.php`	**Email address** + password
Admin gate	Pops up on any Delete or Update button in the admin panels	**Admin ID** + password (one shared pair, below)

Admin gate: ID **`99999`** · Password **`12345`**

Not a user account — it is one hard-coded pair that unlocks every delete and update confirmation screen.

Staff accounts — 10

Enter the **Account ID**, not the email. The email column is shown only because it is what the account holds in the database. Roles are stored but not enforced: all ten land on the same POS panel with full access.

ID	Name	Post	Password	Email on file
7	**Vikram Malhotra**	Manager	**`robertpass`**	`vikram.malhotra@gmail.com`
8	**Sneha Kulkarni**	Manager	**`emilypassword`**	`sneha.kulkarni@gmail.com`
6	**Meera Joshi**	Chef	**`lisapassword`**	`meera.joshi@gmail.com`
9	**Rajesh Pillai**	Chef	**`davidp321ass`**	`rajesh.pillai@gmail.com`
10	**Deepika Chatterjee**	Chef	**`davidpa2ss`**	`deepika.chatterjee@gmail.com`
1	**Arjun Sharma**	Waiter	**`password123`**	`arjun.sharma@gmail.com`
2	**Priya Nair**	Waiter	**`susanpassword`**	`priya.nair@gmail.com`
3	**Rohan Verma**	Waiter	**`jamespass`**	`rohan.verma@gmail.com`
4	**Ananya Iyer**	Waiter	**`alicepassword`**	`ananya.iyer@gmail.com`
5	**Karthik Reddy**	Waiter	**`mikepass`**	`karthik.reddy@gmail.com`

Customer / membership accounts — 20

These log in on the **customer** site with their email address. Member ID and points matter at the POS: entering a member ID on a bill credits that customer with points equal to the grand total.

ID	Acct	Name	Pts	Email (this is the login)	Password
1	11	**Aditya Bansal**	100	`aditya.bansal@gmail.com`	**`david4pass`**
2	12	**Kavya Menon**	200	`kavya.menon@gmail.com`	**`davidp13ass`**
3	13	**Imran Sheikh**	300	`imran.sheikh@gmail.com`	**`david2pass`**

ID	Acct	Name	Pts	Email (this is the login)	Password
4	14	**Nikhil Kapoor**	400	nikhil.kapoor@gmail.com	**davidpa52ss**
5	15	**Sanjay Gupta**	500	sanjay.gupta@gmail.com	**da2332ss**
6	16	**Divya Ramesh**	600	divya.ramesh@gmail.com	**dav43a52ss**
7	17	**Harsh Patel**	700	harsh.patel@gmail.com	**32533pa52ss**
8	18	**Neha Bhatia**	800	neha.bhatia@gmail.com	**754dpa52ss**
9	19	**Manish Agarwal**	900	manish.agarwal@gmail.com	**41f2s**
10	20	**Pooja Deshmukh**	1000	pooja.deshmukh@gmail.com	**oliviapass4215word**
11	21	**Siddharth Rao**	250	siddharth.rao@gmail.com	**password123**
12	22	**Ritu Saxena**	300	ritu.saxena@gmail.com	**password456**
13	23	**Varun Chauhan**	400	varun.chauhan@gmail.com	**password789**
14	24	**Ishita Ghosh**	550	ishita.ghosh@gmail.com	**passwordabc**
15	25	**Aakash Sinha**	650	aakash.sinha@gmail.com	**passworddef**
16	26	**Tanvi Shah**	750	tanvi.shah@gmail.com	**passwordghi**
17	27	**Rahul Krishnan**	900	rahul.krishnan@gmail.com	**passwordjkl**
18	28	**Megha Trivedi**	1050	megha.trivedi@gmail.com	**passwordmno**
19	29	**Abhishek Dubey**	1200	abhishek.dubey@gmail.com	**passwordpqr**
20	30	**Simran Kaur**	1350	simran.kaur@gmail.com	**passwordstu**

Database access

Where	Host	User	Password	Database
phpMyAdmin / config.php	**localhost**	**root**	*(empty)*	**restaurantdb**

Two things worth knowing

These passwords are stored in plain text. The database keeps them exactly as printed here and the login pages compare them with ===. Anyone who opens the Accounts table sees every password. If this project ever leaves your machine, switch to `password_hash()` and `password_verify()` first.

The staff login is injectable. It builds its SQL by pasting the submitted Account ID straight into the query, so a crafted value gets in without a valid password. Prepared statements fix it.

Seed data from restaurantDB.txt · 30 accounts total (10 staff, 20 members) · Local development credentials only.
